BUILDS FIRST FIREPROOF-PAINT PLANT;
MUNITIONS EXPERT DIES

PLANT UNDER CONSTRUCTION IN MOSCOW OBLAST -- Moskovskaya Pravda, No 31, 26 Mar 50

The first USSR plant for the manufacture of antiseptic preparations and fire-proof paints is now under construction in Moscow Oblast. The enterprise will mass-produce antiseptic pastes, high-concentration solutions, and other liquids designed to prolong the life of wooden structures housing units, and public buildings.

BOMSHTEYN DESIGNED NITROGEN PLANTS -- Moskovskaya Pravda, No 30, 25 Mar 50

Ye. I. Bomshteyn, Chief Engineer of the Main Administration of Nitrogen Industry, Ministry of Chemical Industry USSR, died suddenly 23 March 1950. He was a member of the Communist Party, a Stalin Prize laureate, and held the degree of Candidate in Technical Sciences. His untimely death took from the ranks of the chemical industry one of its most talented engineers, a man at the zenith of his creative powers.

Bomshteyn was born in 1907 in Moscow, the son of a factory worker. He graduated from the Moscow Chemical Engineering Institute in 1929, going immediately into the field of designing equipment for, and planning the layout of, nitrogen plants.

During the war he worked on raw materials for munitions, for which work he received the Order of Lenin, the Red Banner of Labor, and the medal "For Valorous Work in the Patriotic War 1941 - 1945."

His glowing memory will long be with those who worked with him.
(Signed) Pervukhin, Tikhomirov, Mel'nik, Ryabenko, Lokshin, Fokin, Akopyan, Milovanov, Planovskiy, Kazartsev, Barskiy, Osipov, Bystrov, Petrov, Samarin, Bannikov.
